

Murata is  
part of your life

**muRata**  
INNOVATOR IN ELECTRONICS

# We at Murata will continue. Smaller parts, bigger dreams!

From superheterodyne radios in the 1940s to today.  
With the introduction of every new device,  
the daily lives of people are enriched.  
Murata is quietly helping that evolution  
by developing smaller, higher-performance parts.  
What kind of life will we create next?  
What kind of world will we aim for?  
At Murata, we always dream big with our small parts.
