

At the farm, in the conference room, on the road. Murata is always at work.

We are a small-parts company,
but our efforts are not limited to electronic components.
Murata's technology can help you see the invisible.
For example, to visualize soil health at the farm.
To visualize fatigue and stress levels in the conference room.
To visualize traffic volume on streets in Indonesia.
In things that are invisible at this point,
we believe there are hidden clues
we can uncover to make the world better.
We will realize a healthy and bright future.

Murata is
part of your life

muRata
INNOVATOR IN ELECTRONICS

Visualization of
soil health
[Soil sensor]

Visualization of
traffic volume
[Traffic Counter System]

Visualization of
fatigue and stress levels
[Fatigue Stress Gauge]
